CONTENTS OF VOLUME 46

BREGER, H., The Mysteries of Adaequare: A Vindication of Fermat . 193

BUTZER, P. L., & R. J. NESSEL, Aspects of de La Vallée Poussin's Work in Approximation and its Influence 67

DIAS, P. M. C., "Will Someone Say Exactly what the H-Theorem Proves?" A Study of Burbury's Condition A and Maxwell's Proposition II 341

DUTKA, J., "Eratosthenes' Measurement of the Earth Reconsidered" . . 55

HERNÁNDEZ MARTÍN, M. C., Esbozo de una logica interna en la obra arquimediana 139

MALET, A., James Gregorie on Tangents and the "Taylor" Rule for Series Expansions 97

NAUENBERG, M., Newton's Early Computational Method for Dynamics 221

NESSEL, R. J., see BUTZER, P. L. 67

RECASENS, E., J. Zaragoza's *Centrum Minimum*, an Early Version of Barycentric Geometry 285

SHEYNIN, O., On the History of the Principle of Least Squares 39

SHEYNIN, O., The Treatment of Observations in Early Astronomy . . . 153

SHEYNIN, O., C. F. Gauss and Geodetic Observations 253

SHEYNIN, O., Chebyshev's Lectures on the Theory of Probability . . . 321

TAZZIOLI, R., Ether and Theory of Elasticity in Beltrami's Work . . . 1

ZAITSEV, E. A., An Interpretation of Peano's Logic 367
